MANUAL GUIDE TO ESM VOLUNTEER

1/ Download the AWARE V2 https://itunes.apple.com/jp/app/aware-client-v2/id1455986181. Here is the interface:
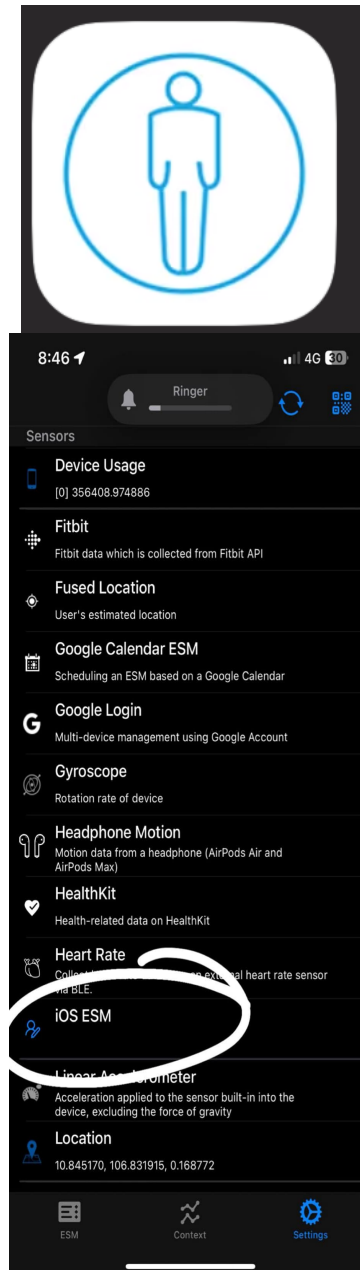

2/ Go to Settings, then go to "iOS ESM" and paste this link into the plugin: https://khanghcmut.github.io/ESM_AWARE/ESM_test.json. Also, set the status to be true.
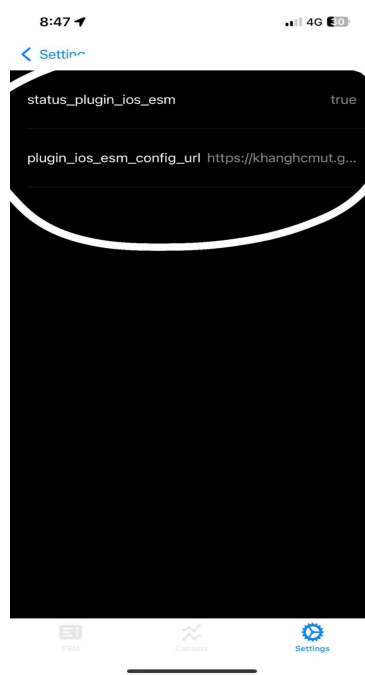

3/ Still in the Settings section, change these following configurations:

Activity Recognition: status: true, frequency: 300, preperiod_days: 0
Battery: status: true
Communication: status: true
Device Usage: status: true
Location: status: true, frequency: 60, accuracy: 10

Upcoming configurations update: Calendar, Network, Pedometer, Push Notification.
(these configs could be required to be updated in the future)

4/ Go to "Context", press "+" and choose "locations" to add Location context card to update your location. Then, occasionally press the 'Recycle Symbol' on the top right corner to load your locations into the card.
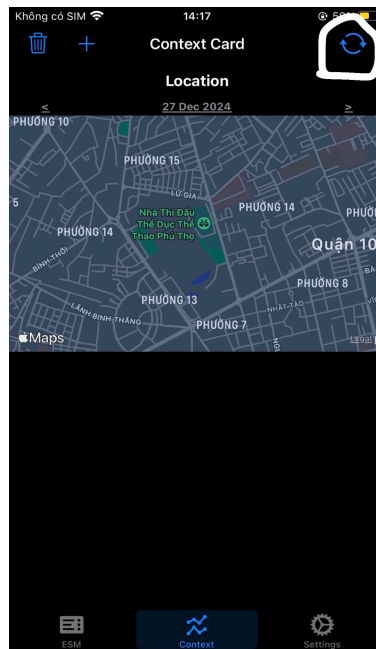

Currently, this is the end of the guide for the survey implementation. However, please stay tuned for future updates and requests. Once again, thank you for your volunteer in this project.
